GROUP 3600

Claim 1 (amended) A system for facilitating a delivery and pickup of goods comprising:

- a plurality of locker modules, each of said locker modules having a plurality of locker units, a locker controller, a user interfacing device, a user-identifying device, and a remote receiving and transmitting device;
 - a system controller independent from the plurality of locker modules, the system controller having an application server, a database server, and a remote receiving and transmitting device for communicating with said remote receiving and transmitting device of said locker modules;
 - a customer's PC terminal communicably connected to said system controller;
 - a vendor's PC terminal communicably connected to said system controller; and
 - a delivery agent's PC terminal communicably connected to said system controller;
- wherein said system controller is adapted to facilitate leasing of said locker units by registered parties for delivery or pickup of a good, said registered parties including a customer, a vendor and a delivery agent.
